

# METAL ARGENTA ENCLOSURES

## METAL ARGENTA ENCLOSURES

GARRO offer a premium range of Metal Argenta IP66 rated Enclosures. They are High Resistance Impact IK10. The enclosure can be put directly onto a wall, guaranteeing the IP protection rating. The Argenta range is suitable for housing switchgear, control gear & other equipment used in the supply and distribution of electricity. The enclosures are made with high quality materials in cold-rolled steel plate of up to 2mm thick.
